

Detailed Inventory

PWS Name: Anson and Madison Water District

PWSID: ME0090930

Date Last Updated:

11/25/2025

Purpose of this worksheet: To provide a customizable format water systems can use to track materials for each service line in their distribution system.

General Instructions: Each row in this worksheet represents one service line connecting the water main to the customer's plumbing. The worksheet includes required and recommended elements; the columns with the aqua shading are required by the LCRR. Systems can customize by adding or deleting columns. Important notes for each column are in Row 12; also see the **Template Instructions** worksheet for detailed instructions. Note that users can freeze panes to enable them to see the headings and notes when entering data. The worksheet includes examples in rows 13 - 20 and is formatted for approximately 10,000 entries.

Location Information						System-Owned Portion		Customer-Owned Portion		Entire Service Line Material Classification
Unique Service Line ID	Location Identifier					System-Owned Portion Service Line Material Classification	Basis of Material Classification	Customer-Owned Portion Service Line Material Classification	Basis of Material Classification	
	Street Address	Street	Town	State	Zip					
A Unique ID is recommended for each	Water systems must track addresses of all service lines in their internal inventory. For the publicly accessible version, location identifiers are required for lead and galvanized requiring replacement. If the system does not use addresses for their location identifier, other options could include GPS coordinates, landmark, intersection, block, or other details to specify service line locations.					Dropdown list includes recommended subclassifications. If "Non-Lead-Other" describe in Notes	Select option from drop down list. If "Other," describe in the Notes field	Dropdown list includes recommended subclassifications. If non-lead other, describe in	Select option from drop down list. If "Other," describe in the Notes field	Dropdown list includes four required service line classifications of Lead, Non-Lead, Galvanized Requiring Replacement

Location Information						System-Owned Portion		Customer-Owned Portion		Entire Service Line Material Classification
Unique Service Line ID	Location Identifier					System-Owned Portion Service Line Material Classification	Basis of Material Classification	Customer-Owned Portion Service Line Material Classification	Basis of Material Classification	
	Street Address	Street	Town	State	Zip					
A Unique ID is recommended for each	Water systems must track addresses of all service lines in their internal inventory. For the publicly accessible version, location identifiers are required for lead and galvanized requiring replacement. If the system does not use addresses for their location identifier, other options could include GPS coordinates, landmark, intersection, block, or other details to specify service line locations.					Dropdown list includes recommended subclassifications. If "Non-Lead/Other," describe in Notes field.	Select option from drop down list. If "Other," describe in the Notes field.	Dropdown list includes recommended subclassifications. If non-lead/other, describe in	Select option from drop down list. If "Other," describe in the Notes field.	Dropdown list includes four required service line classifications of Lead, Non-lead, Galvanized Requiring Replacement
